SUMMARY

Product designer with 4+ years taking products from brief to live release across fintech, B2B SaaS, consumer apps and education. I design the system, then build it: from Figma to production with Claude Code, Lovable and Supabase, without waiting on a separate engineering team. Results include an 18% conversion lift at DealMate and a 40% cut in developer handoff time from the Jomppa design system.

EXPERIENCE

Founder & Principal Product Designer, MoCreative Concept

Lagos · Remote · 2024 – Present

Product design and AI automation practice. Client work and own products:

- **DealMate (fintech escrow):** redesigned the peer-to-peer transaction flow around clear trust signals at the moments users worry most. Conversion up 18%, support tickets down 30%.
- **Topkids Montessori School:** moved student and payment records from paper to a Notion system (admin errors down an estimated 35%) and fixed 8+ admissions bottlenecks.
- **Agentic operating system (own product):** 15 live AI agents (34 planned) on Claude, Supabase and Resend, running the lead pipeline, proposals, invoicing and spend control, with human approval before anything is sent.
- **Job search agent (own product):** scans remote roles weekly, checks each one is live, scores fit and drafts applications, but never applies on its own. Every drafted answer is tagged verified or claimed.

Designer & Developer, Next Level Procurement (formerly Shopall Superstore & Logistics)

UK · Remote · Jan 2021 – Present

- Sole designer since 2021: social campaigns for Shopall (engagement up 60%), then the rebrand to Next Level Procurement (identity, visual direction, positioning).
- Designed and shipped the website, nextlevelprocurements.com, with Lovable and Claude Code; now designing its platform.

Product Designer, LeapTra

Remote · Sep 2025 – Present

- Designed AI agents for sales, marketing, onboarding, operations and support, lifting business efficiency by 40%.
- Designed an email organiser and lead-qualifier agent that scores and routes prospects into the CRM: response time down 52%, lead conversion up 28%.
- Designed admin dashboards and real-time monitoring that improved internal reporting efficiency by 35%.
- **Jomppa (cross-border errand PWA, from Oct 2025):** led end-to-end product design. Built the Figma design system across 50+ screens, cutting developer handoff time by 40%. Shipped as a PWA to remove app-store friction for diaspora users: load time down 45%, onboarding time down 25%, engagement up 40%.

Product Design Intern, Young Titans Foundation

Remote · Jul 2025 – Oct 2025

- Designed the foundation's website and landing page (WCAG 2.1 AA), increasing user engagement by 52%.
- Ran 50+ one-to-one interviews with teachers and parents, turned the findings into roadmap priorities, and led a team of 2–3 designers to deliver the site.

SKILLS

Product design: 0→1 product design, UX research, usability testing, interaction design, information architecture, wireframing, prototyping, dashboard and admin design, accessibility (WCAG 2.1 AA)

Systems and brand: Design systems, Figma (components, auto-layout, variants, variables, tokens), visual identity, Framer

AI-native build: Claude Code, Cursor, Lovable, Figma Make, Trae AI, AI agent design, Supabase, Vercel, Git, Webflow, Notion

Domains: Fintech, B2B SaaS, consumer apps, EdTech, job search and HR tech

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science | National Open University of Nigeria · in progress, final year

NCE, Computer Science & Mathematics | Lagos State University of Education · 2019

Certifications: Design Thinking & Human-Centered Design (IBMI Berlin) · Figma for UX/UI Design (Alison) · Agile for Designers (Coursera)
